Training

Lovely Professional University | Student

Jun'25

- Built strong foundations in Data Structures, working with 8+ core structures including arrays, linked lists, stacks, queues, trees, graphs, heaps, and hash tables. Implemented 15+ algorithms covering sorting, searching, and recursion using C++
- Utilized Visual Studio Code and C++ to design and debug 20+ modular programs, implementing dynamic programming, graph traversal (BFS/DFS), and hashing techniques for optimized problem-solving. Visual Studio Code, C++, Dynamic Programming, Graph, Hash table.
- Demonstrated practical implementation of arrays, stacks, queues, heaps, and sorting algorithms to ensure efficient resource allocation.

Tech: C++

PROJECTS

Fintra | [FINTRA](#) | <https://github.com/Aashu31/Fintra>

Jun' 2026

- Developed a full-stack finance management application to track income, expenses, transactions, and financial insights through an interactive analytics dashboard
 - Implemented secure JWT-based authentication, bcrypt password hashing, and role-based access control, providing separate permissions for Admin and Viewer users
 - Designed interactive financial visualizations including balance trends, spending breakdowns, savings rate, transaction filtering, and monthly financial insights.
 - Designed responsive interfaces and optimized performance for scalable and user-friendly experiences
- Tech used:** HTML, CSS, JavaScript, PostgreSQL, React js, Node js, Git

Resume Builder | [Edith](#) | <https://github.com/Aashu31/Edith>

Jul' 2026

- Built a full stack web app where users can upload their resume and paste a job description, and AI automatically rewrites the resume to match the job keywords
 - Used Gemini AI API to extract important keywords from job descriptions and rewrite resume bullet points to improve ATS match score
 - Built a real-time ATS scoring system that shows how well the resume matches the job description in percentage
 - Integrated Stripe payment gateway to handle Free and Pro subscription plans with webhook support
- Tech Stack:** React.js, Node.js, JWT Authentication, Gemini API"

| GIT, GitLab, GitHub Fundamentals Udemy | Jul' 2025 |

ACHIEVEMENTS

Solved 200+ DSA Problems on LeetCode

Jul' 2026

Recognized for strong problem-solving consistency and algorithmic thinking

Earned multiple Aws, Devops, and Web Development certifications

Jun' 2026

Completed cloud-based learning challenges and hands-on technical labs.

Achieved a 5-Star Java Badge on HackerRank

Aug' 2025

Achieved 5 star badge in hackerrank website in Java Programming
