

AASHU SINGH

Cloud & DevOps Engineer (Fresher)

Jalandhar, Punjab | +91 8252461926 | saashu829@gmail.com | linkedin.com/in/aashu31 | github.com/Aashu31

PROFESSIONAL SUMMARY

Cloud & DevOps fresher pursuing B.Tech in Computer Science Engineering, with hands-on experience across AWS (EC2, VPC, IAM, S3, ELB, Auto Scaling, CloudWatch), Microsoft Azure (AKS, ACR), Docker, Kubernetes, Jenkins, GitHub Actions, and Terraform, built through self-driven DevOps projects and AWS Academy hands-on labs. Experienced in containerization, CI/CD pipeline design, Linux administration, and shell scripting automation. AWS Academy Graduate in Cloud Architecting and Cloud Foundations, with 200+ DSA problems solved on LeetCode. Seeking a Cloud/DevOps Engineer internship to contribute to production CI/CD workflows and cloud infrastructure automation.

TECHNICAL SKILLS

Cloud Platforms: AWS: EC2, VPC, IAM, S3, ELB, ECR, ECS, Auto Scaling, CloudWatch (Intermediate); Microsoft Azure — AKS, ACR (Advanced)

Containerization & Orchestration: Docker, Kubernetes, Multi-stage Builds, Container Registries

CI/CD & Automation: Jenkins, GitHub Actions, GitLab CI/CD, CI/CD Pipelines, Maven, Shell Scripting

Infrastructure as Code & Systems: Terraform, AWS CloudFormation, Linux/Ubuntu, Networking Fundamentals, Nginx, Apache, Ansible

Version Control & Collaboration: Git, GitHub, GitHub Webhooks, GitHub Apps, Octokit

Programming & Backend: Java, TypeScript, JavaScript, Spring Boot, Fastify, REST APIs, PostgreSQL, Prisma, Flyway

PROJECTS

CloudShip — Intelligent DevOps Deployment & Recovery Platform

Java, Spring Boot, Docker, Kubernetes, Jenkins, Azure (ACR/AKS), PostgreSQL, Flyway | [Github](#) | [Cloudship](#)

- Engineered a Spring Boot REST backend with PostgreSQL and Flyway-managed schema migrations, exposing Liveness/Readiness health-check endpoints for automated deployment monitoring.
- Containerized the application using multi-stage Docker builds with non-root execution (UID 10001), hardening the runtime for production-style deployment.
- Configured Docker Compose for local multi-service orchestration (backend, database, frontend) to maintain environment parity between local and cloud deployment targets.
- Architected a complete CI/CD pipeline (GitHub → Jenkins → Docker → Azure Container Registry → Kubernetes → Azure) with an automated rollback workflow (kubectrl rollout undo) on health-probe failure, documented across a 15-phase infrastructure roadmap.

DiffMind AI — AI-Powered Code Review for GitHub Pull Requests

TypeScript, Node.js, Fastify, Next.js, React, Prisma, PostgreSQL, NVIDIA Nemotron, Octokit | [Github](#)

- Built a GitHub App integrating the NVIDIA Nemotron 3 Ultra LLM to automatically analyze and review pull requests through a custom reasoning agent.
- Implemented a Fastify webhook handler with signature verification to trigger automated code reviews on PR open, synchronize, and reopen events.
- Developed an agent loop with read-only repository-inspection tools (diff parsing, file content, metadata retrieval) to generate structured, severity-ranked findings validated with Zod schemas.
- Automated inline PR review comments via Octokit and built a review-history dashboard (Next.js, React, TypeScript, Tailwind CSS) backed by PostgreSQL through Prisma ORM.

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science & Engineering

Expected 2027

Lovely Professional University, Jalandhar, Punjab | CGPA: 6.7

CERTIFICATIONS & TRAINING

- AWS Academy Graduate — AWS Academy Cloud Architecting
- AWS Academy Graduate — AWS Academy Cloud Foundations
- Git, GitLab & GitHub Fundamentals for Software Developers — Udemy
- AWS Cloud Training — Beginner & Intermediate Level

ACHIEVEMENTS

- Solved 200+ DSA problems on LeetCode — recognized for strong problem-solving consistency and algorithmic thinking.
- Achieved a 5-Star Java Badge on HackerRank for proficiency in Java programming.
